## SKILLS

**Back-end & frameworks**
PHP · Symfony · Laravel · API Platform · Sylius · Drupal

**Databases**
SQL · PostgreSQL · MySQL / MariaDB · Doctrine

**AI & agentic workflows**
Claude Code · custom agents and skills · project rules and context · quality guardrails · human review

**Front-end**
JavaScript · Vue.js · React · Twig · Stimulus · Livewire · HTML/CSS

**Async processing**
Symfony Messenger · Supervisor

**Testing & quality**
PHPUnit · PHPStan (up to level 8) · PHP CS Fixer

**Security & authentication**
JWT · OAuth2 · Symfony Security · CSP

**DevOps & CI/CD**
Docker · Docker Compose · Linux (Debian) · GitLab CI

**Production & observability**
Sentry · profiling · Git · Composer · Makefile

# Aude MILLÉQUANT

**SENIOR PHP / SYMFONY DEVELOPER · BACKEND & AI WORKFLOWS**

PHP / Symfony developer with **7 years** of experience, specialised in Symfony and Laravel. I design, build and run B2B business applications, from requirements analysis through to production support.

I build **agentic AI** into my development cycle (Claude Code, custom agents and skills), with quality guardrails and systematic human review of all generated code.

Experienced in major version upgrades (Symfony, Laravel, API Platform) and in raising code quality with PHPStan. I work autonomously on technical decisions and favour pragmatic, maintainable solutions that serve real business needs.

## PROFESSIONAL EXPERIENCE

### FULL-STACK PHP / SYMFONY DEVELOPER
May 2022 – present

**ACSEO · Aix-en-Provence, France (fully remote)**

Design and evolution of B2B business applications (ERP, APIs, e-commerce platforms), from requirements analysis to production, working closely with the team.

- **AI workflows:** designed custom Claude Code agents and skills (project rules, context, best practices and quality guardrails) built into the development process; all generated code is reviewed and tested before delivery.
- **Code review and mentoring:** regular code reviews and mentoring of junior developers.
- **Production and CI/CD:** troubleshooting incidents and performance issues (Sentry, profiling, query optimisation), deploy.php scripts and automated deployments with GitLab CI/CD.
- **Quality and technical debt:** introduced PHP CS Fixer; progressively fixed PHPStan errors from level 0 up to level 8 depending on the project.
- **Bike refurbishing:** evolved a Laravel ERP (business features, imports, KPIs); migrations from Laravel 8 → 11 and Livewire 2 → 3.
- **Building engineering:** API integration to sync quotes and invoices between a Symfony ERP and Fitnet: domain services, DTOs, async processing with Symfony Messenger and workers managed by Supervisor.
- **Sports federation:** API Platform upgrade, API evolution and Vue.js 2/3 work.
- **Marketing operations:** Symfony migrations, Redmine plugins and team modernisation of legacy PHP/jQuery sites to React.
- **E-commerce:** product return and customer review features on Sylius / Symfony.

### PHP / SYMFONY / DRUPAL DEVELOPER
Feb 2021 – May 2022

**AXESS / IO-LAB · Lyon, France**

- Built features for a Drupal 8 multi-site platform: APIs, modules and hooks, based on business needs and client constraints.
- Performance optimisation: profiling, fewer database queries, Twig template optimisation.
- Corrective and evolutive maintenance, code reviews.

### PHP / SYMFONY / DRUPAL DEVELOPER
Apr 2019 – Jan 2021

**MMDev · Remote**

- Built features for Drupal 8 sites and Symfony applications: APIs, custom modules and hooks.
- Corrective and evolutive maintenance on client projects, working with front-end teams.

## EDUCATION

**Web and mobile web developer**
Sep 2018 – Feb 2019
**O'clock school**
French state-certified professional qualification

**Master's degree (MSc)**
Aug 2005
**AUDENCIA Business School, Nantes**
Management, finance major

## LANGUAGES

**French**
Native

**English**
B2 (upper intermediate)

## INTERESTS

**Chair of the Raid&Co association**
Charity car rally, 2028

**Horse riding**

## PERSONAL PROJECT

### RAID&CO · RAIDANDCO.FR
2026 – present

*Designed, built and shipped to production a complete web platform on Symfony 7.4 for a charity car rally I am taking part in.*

- **Full-stack development:** public website and admin back office.
- **API integration and automation:** HelloAsso, AI services, AI-assisted content generation and social media publishing.
- **Quality and delivery:** tests, static analysis (PHPStan), coding standards (PHP CS Fixer) and automated deployments.
- **AI-assisted development:** Claude Code and custom skills to speed up development, structure workflows and support code review.

## BEFORE SOFTWARE DEVELOPMENT

*A deliberate career change that shapes how I work as a developer today: understanding the business, rigour and supporting people.*

### PRIMARY SCHOOL TEACHER
2015 – 2017
**French national education system · Loire**

Teaching, classroom management, organisation and communication with families and partners.

### MANAGER OF A BAR-HOTEL-RESTAURANT
2012 – 2014
**SARL Les Farges · Sainte-Catherine, France**

Ran the business independently.

### RIDING INSTRUCTOR
2008 – 2011

Coaching, teaching and one-to-one support.

### FINANCIAL AUDITOR
2005 – 2008
**PwC · Nantes, France**

Financial audit, data analysis, reporting, internal control and team support.
